Please also inform Mr. Robertson know the follow up fax was sent on the 27th of May to Costillo, and this documentation is available upon request should he need it.

This was written to confirm email and phone conversations with local office requesting assistance for concerns specified in letter at link.

Thank you for your assistance and please confirm contact info for our Cheif of Antilles Reg. This is not the only issue regarding Culebra copied Antilles for which there was no response. Last August, a letter with over 500 signatures brought to the attention of all agencies (via certified mail) a concern about an illegal segregation impacting mangrove wetlands off a critical habitat nesting beach and waters at Zoni Beach.
